

**4 Lower Ragsdale Drive, Suite 220  
Monterey, CA 93940  
[www.mrsl.com](http://www.mrsl.com)**

**Job Duties:**

Design, implement, and maintain large software systems. Demonstrated experience with Linux, C/C++, SQL, Python, and GUI design. Design and implementation of data structures and algorithms, unit/regression testing, revision control systems, defensive coding practices, and providing external support for large software systems. Experience with statistical signal processing and communications systems is desirable, but not required.

**Software Engineer - Minimum Qualifications:**

Seeking superior engineering professionals. This is an opportunity to join a small team of exceptional researchers in developing and implementing cutting-edge signal processing technologies. The position is open to qualified software engineering professionals with experience designing, implementing, and maintaining large software systems. Demonstrated experience with Linux, C/C++, SQL, Python, and GUI design are required. The ideal candidate should have experience with the design and implementation of data structures and algorithms. Experience with unit/regression testing, revision control systems, defensive coding practices, and providing external support for large software systems is a plus. Some experience with statistical signal processing and communications systems is desirable, but not required.

- B.S. or M.S. degree in a Computer Science or Electrical Engineering is required.
- Minimum of two years of work related experience is required with five or more years desirable.
- TS/SCI clearance required so you must meet eligibility requirements for access to classified information. U.S. Citizenship required.
